

Visualization:

Sum of Age of House (in Years)	1,015,617
Count of Transformed_Housing_Data2.csv	21,609
Avg. Sale Price	511,619

Housing Data Analysis – Preparation Steps

1 Data Collection

- Gather housing dataset (Transformed_Housing_Data2.csv).
- Include variables such as:
 - Sale Price
 - Age of House
 - Renovation Status
 - Number of Bedrooms
 - Number of Bathrooms
 - Number of Floors

2 Data Cleaning & Transformation

- Remove missing or duplicate records.
- Convert data types (e.g., price to numeric).
- Create calculated fields:
 - Price Bins (250K, 300K, etc.)
 - Years Since Renovation
 - Average Sale Price
- Standardize column names.

3 Data Aggregation & KPI Creation

- Calculate:
 - Total number of houses
 - Average Sale Price
 - Sum of Age of Houses
- Group data by:
 - Sale Price ranges
 - Renovation status
 - Age categories

4 Exploratory Data Analysis (EDA)

- Analyze relationship between:
 - House age and sale price
 - Renovation status and price
 - Bedrooms/Bathrooms and property value
- Identify high-demand price segments.

5 Visualization Development

Create dashboard elements:

- KPI Cards (Total Houses, Avg Price, Sum of Age)
- Bar Charts (Sales by Price Bin)

- Pie Chart (Renovation Distribution)
 - Comparative Chart (Bedrooms, Bathrooms, Floors vs Age)
-

6 Insight Generation

- Identify trends in pricing.
 - Detect which features influence higher prices.
 - Determine whether renovation increases property value.
-

Business Questions

1 What is the average sale price of houses?

- How does it vary across price bins?

2 Does renovation significantly increase property value?

- Are renovated houses sold at higher price ranges?

3 Which price range has the highest number of sales?

- Where is market demand strongest?

4 How does house age impact sale price?

- Do newer houses sell for more?

5 Do more bedrooms or bathrooms increase selling price?

- Which feature contributes most to value?

6 Is there a relationship between number of floors and house age?

7 What is the total housing inventory analyzed?

- How large is the dataset?

8 Are older houses more likely to be renovated?
